

Rishi Majmudar

Software Developer

+1 (753) 881-2552 | rishimajmudar25@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software Developer with 3+ years of experience designing and delivering scalable full-stack web applications using Java, Spring Boot, Node.js, React, and TypeScript. Skilled in building microservices, REST and GraphQL APIs, and event-driven systems deployed on AWS and GCP with Docker and Kubernetes. Strong grasp of object-oriented design, SOLID principles, design patterns, and secure coding practices. Experienced in CI/CD automation, test-driven development, Agile/Scrum delivery, and collaborating with cross-functional teams to ship reliable, performant, and maintainable software.

SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML5, CSS3, Bash

AI & Machine Learning: Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Ollama, Prompt Engineering, Vector Search, Embeddings, Hybrid Search (BM25 + Vector Search), ChromaDB, Semantic Search, Natural Language Processing (NLP)

Frontend: React, Redux, Next.js, Angular, Tailwind CSS, Bootstrap, Storybook, Webpack, Vite, Streamlit

Backend: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate, Node.js, Express.js, NestJS, REST APIs, GraphQL, Microservices, Kafka

Databases: MySQL, PostgreSQL, MongoDB, Oracle, Redis, DynamoDB

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS, API Gateway, EKS), GCP, Azure, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, Heroku

Testing & Quality: Jest, React Testing Library, Cypress, JUnit, Mockito, Selenium, SonarQube, TDD, BDD

Tools & Practices: Git, Bitbucket, Jira, Confluence, Postman, Swagger/OpenAPI, Agile/Scrum, Kanban, SDLC, OAuth2, JWT, OWASP, Datadog

EDUCATION

Master of Engineering in Software Engineering | Carleton University, Ottawa, Canada

Jan 2024 – Jun 2025

Bachelor of Engineering in Computer Science | Gujarat Technological University, Gujarat, India

Jul 2019 – Jun 2023

EXPERIENCE

DXC Technology, Canada | Software Developer

Jan 2025 – Present

- Develop scalable full-stack web applications using React, TypeScript, Next.js, Java, and Spring Boot, deployed as microservices on AWS EKS across dev, staging, and production environments.
- Design and implement REST and GraphQL APIs with Spring Boot and Spring Cloud, supporting event-driven integrations via Apache Kafka and improving throughput for 500K+ daily requests.
- Build reusable UI components with React, Redux, and Tailwind CSS, documented in Storybook and adopted across squads to cut feature delivery time by around 30%.
- Secure applications using OAuth2, JWT, and role-based access control, applying OWASP Top 10 practices to harden APIs and reduce security findings in code reviews by 40%.
- Automate CI/CD pipelines with GitHub Actions, Jenkins, and Terraform-managed infrastructure, reducing average deployment time from 30 to 12 minutes and standardizing release processes.
- Developed Spring Boot modules implementing business logic, workflows, and enterprise services for compliance SaaS products used by 200+ clients in regulated industries.
- Built and tested REST and SOAP web services using Postman, JUnit, and Mockito, improving API reliability and reducing post-release defects by 30%.
- Contributed to Salesforce solutions using Apex, Lightning Web Components (LWC), triggers, and Visualforce to support mission-critical customer workflows.
- Performed optimized CRUD operations with Hibernate ORM across MySQL and Oracle, writing tuned SQL and stored procedures for reporting and analytics.
- Write unit, integration, and end-to-end tests with Jest, React Testing Library, JUnit, Mockito, and Cypress, sustaining code coverage above 85% and catching regressions earlier in the SDLC.
- Optimize PostgreSQL queries, Hibernate mappings, and Redis caching layers, improving API response times by up to 35% on high-traffic endpoints.
- Collaborate in Agile/Scrum ceremonies, lead code reviews, and use AI coding assistants (GitHub Copilot) to accelerate delivery while maintaining SOLID principles and clean code standards.

Newgen Software, India | Software Developer

May 2022 – Dec 2023

- Built end-to-end features for billing, storefront, POS, and customer portal platforms using React, TypeScript, Node.js, Java, and Spring Boot in microservices architecture.
- Designed secure RESTful APIs with Spring Boot, Spring Data JPA, and Swagger/OpenAPI documentation, powering workflows that processed 10,000+ daily transactions.
- Developed a reusable React + Tailwind component library documented in Storybook, adopted across 4 product teams and reducing duplicated UI code by 40%.
- Developed Spring Boot modules implementing business logic, workflows, and enterprise services for compliance SaaS products.
- Built and tested REST and SOAP web services using Postman, JUnit, and Mockito, improving API reliability and reducing post-release defects by 30%.
- Contributed to Salesforce solutions using Apex, Lightning Web Components (LWC), triggers, and Visualforce to support mission-critical customer workflows.

- Performed optimized CRUD operations with Hibernate ORM across MySQL and Oracle, writing tuned SQL and stored procedures for reporting and analytics.
- Implemented JWT authentication, role-based access control, and OWASP-aligned input validation to secure billing and payment operations across all customer-facing apps.
- Integrated Stripe payment gateway with webhook processing, idempotency handling, and retry logic, reducing failed transactions by 20%.
- Automated CI/CD workflows with GitHub Actions and Jenkins, containerized services using Docker, and deployed to AWS (EC2, S3, RDS) and Heroku, cutting deployment time by 40%.
- Increased test coverage from 55% to 85% by introducing Jest, React Testing Library, JUnit, and Cypress, integrated with SonarQube for continuous code quality checks.
- Led feature development from grooming to release in an Agile/Scrum environment, partnering with designers, product managers, and QA to translate business needs into technical solutions.

PROJECTS

AI Document Parser:

[GitHub](#) [Demo](#)

- Designed a serverless, event-driven architecture that processed 1,000+ documents with zero idle compute costs, reducing total infrastructure spend by 40%.
- Integrated Amazon Bedrock and Textract to automate OCR and data synthesis, improving document processing speed by 60% compared to manual workflows.
- Optimized DynamoDB performance using Global Secondary Indexes (GSI), achieving sub-10ms query latency for large-scale metadata retrieval.

AWS Three-Tier Architecture:

[GitHub](#)

- Provisioned a production-ready VPC using Terraform Modules, reducing manual configuration time by 70% and ensuring 100% environment consistency across Dev/Prod.
- Hardened security posture by implementing GitHub Actions with OIDC, removing long-lived credentials and decreasing potential attack surfaces by 80%.
- Deployed CloudFront and ALB to serve global traffic, realizing a 30% reduction in latency and ensuring seamless failover.

Microservices on Amazon EKS:

[GitHub](#)

- Orchestrated containerized microservices on Amazon EKS, maintaining 99.9% uptime through automated self-healing and Horizontal Pod Autoscaling (HPA).
- Implemented RBAC and IAM Roles for Service Accounts (IRSA), enforcing the Principle of Least Privilege and reducing internal security risks.
- Managed stateful workloads using MongoDB Stateful Sets, ensuring data persistence and zero-loss scaling during high-traffic.

Hybrid RAG Explorer:

[GitHub](#)

- Developed a Hybrid RAG system combining BM25 keyword search and ChromaDB vector search with Reciprocal Rank Fusion (RRF) to improve document retrieval accuracy and relevance.
- Built an end-to-end document ingestion pipeline supporting PDF, DOCX, TXT, and CSV files with automated chunking, metadata extraction, incremental indexing, and source attribution.
- Integrated Ollama-hosted LLMs and embedding models into a Streamlit application, enabling real-time document question answering with explainable AI responses and retrieval analytics.

CERTIFICATIONS

- **AWS Certified Solutions Architect**
- **Certified Kubernetes Administrator (CKA)**
- **Terraform Associate**
